

WTDGA COVID-19 POLICY

April 25, 2022

The WTDGA is concerned about our members' health and wellbeing. To this end, we have adopted the following guidelines for our golfers.

With the development of multiple COVID-19 variants, the risk to our players is still real. We support our vaccinated members and thank them for staying up to date according to the CDC guidelines for vaccination.

We ask that our players, vaccinated and unvaccinated, be responsible members and **not play in WTDGA tournaments if they show symptoms of illness. Additionally, if they have come in contact with someone who has possibly contracted COVID-19, we ask that they test before playing in an event.**

We need to assure our members who have concerns about contracting COVID that they are safe. **If you have not been vaccinated, even if you are not exhibiting symptoms, we ask that you disclose this to the administration unless you signed up with players who know your status.** Members that do not want to share a cart with an unvaccinated player will not have to do so.

Golf is a game of integrity, and we believe our golfers will adhere to this policy. If you play in a WTDGA tournament, you are affirming:

- You do not have COVID-19-like symptoms.
- If you have had contact with an infected individual or someone exhibiting COVID-like symptoms, you have tested negative.
- Unvaccinated players have informed the WTDGA Administration of their status to facilitate pairings that respect all players' concerns.

Our goal is to allow all our members to enjoy our events and feel safe playing the game they love.

The WTDGA
